1. The export regime allows Albanian goods to leave the customs territory of the Republic of Albania. Exporting entails the implementation of exit formalities, including trade policy measures and, where appropriate, export duties.

2. With the exception of goods placed under the passive processing regime, all Albanian goods intended for export are placed under the export regime.

3. The cases and conditions in which the goods leaving the customs territory of the Republic of Albania are not subject to an export declaration, are determined in the by-laws implementing this Code and, if necessary, by provisions issued by the Minister of Finance.

4. The export declaration must be submitted to the competent customs office for the supervision of the country where the exporter is located, or where the goods are packed or loaded for export. In case it is necessary, the exceptions to this case are defined in the by-laws in implementation of this Code.

The release of goods for export is granted on the condition that the goods in question leave the customs territory of the Republic of Albania in the same condition as they were on the date of acceptance of the export declaration
